

## Review for Exam 2

*At first, try doing this **without looking in your book**. When you do need to look up a word or base, be sure to mark it – this will help you when studying later to determine which components need special attention.*

*You must break the underlined words below up into their components and define the meaning of each part. Then, using your breakdown of the word and the context that the sentence provides, take a guess at what you think this word actually means.*

1) Example Sentence: Because of her strong background in chemistry and interest in medicine, Susie decided to go to school for pharmacology.

Component and its meaning:

Component and its meaning:

What you think it means as a whole:
